

MO-ST-01 RANGE (STREET POLE)

Light duty, integrated street pole made using pipes welded together and connected using bolted joints. The street pole is available in different base sizes and antenna capacity options. The structure can be adapted to carry multiple street lights and has an extensive range of applications.

The pole uses integrated antenna container (5G) at the top and can be modified to carry multiple antennas. The base foundation is adaptable to concrete or grillage foundations.

This structure complies with international design standards (TIA222H) and can be re-certified to other standards if required.

Features

- All sections are bolted for ease of assembly and installation
- Available in standard and heavy models
- Fully hot-dip galvanized
- S355 Steel
- TIA-222-H standard (can certify to other standards)
- Adaptable base and top dimensions
- Optimized for weight for per-case FPA*
- Options available for design adaptation to special wind & ice conditions
